

SmartHRMS Employee Lifecycle Workflow

A comprehensive operations guide mapping the system flows from hire to retire

This operations manual documents the complete lifecycle workflow of the SmartHRMS application. It details the paths, database triggers, and operations linking Recruitment, Onboarding, Active Employee Management, Leaves, Payroll, Compliance, Appraisals, and Offboarding.

Lifecycle Workflow Map

PHASE 1: RECRUITMENT	
1. Post Job Opening (JobsPage)	Create comp bands, set openings, and publish to portal.
2. Receive Candidate Profile	Linked to job position or submitted via referrals.
3. Kanban Screening Stage	Drag through: screening, interview, offer, joined.
4. Log Interview Rounds	Score fit, panel notes, verify expectation, decide status.
PHASE 2: INDUCTION & ONBOARDING	
5. Provision User Account	Mark joined -> provision CustomUser profile + role.
6. Force Credentials Reset	Set must_change_password to true on login page.
7. Checklist Document Upload	Accept verification proofs, assign shift, location, dept.
PHASE 3: OPERATIONS & ACTIVE LIFECYCLE	
8. Daily Geofenced Attendance	Clock-in via coordinate validation check against boundaries.
9. Leave Requests Ledger	Manager approves request, balance updates, ledger logs row.
10. Training & Review Appraisals	Bulk enroll mandatory courses, log appraisal goals.
PHASE 4: COMPENSATION & COMPLIANCE	
11. Salary Revisions & Loans	Increment updates base salary. Loan EMIs auto-deduct.
12. Run Payroll Batch	Process HRA, PF, ESI, and LOP deductions. PDF payslip.
13. Statutory Compliance Export	Download PF Challans, ESIC logs, Form 16 quarterly.
PHASE 5: DISCIPLINARY & OFFBOARDING	
14. Incident Warning Letters	Formal written warnings trigger Offboarding if notice is set.
15. Exit Clearance Desk	Clear assets, approve handovers, settle LOP gratuity.
16. Profile Archive	Set is_active=False. Blacklist active login auth tokens.

Phase 1: Recruitment & Talent Pipeline

Covers posting job details, tracking candidate pipelines, conducting evaluations, and finalizing offers.

UI Component / Screen	Backend API Endpoint	Operational Description
JobsPage.tsx	GET/POST /api/recruitment/jobs/	Job details, openings, salary bands, portal visibility.
CandidatesPage.tsx	PATCH /api/recruitment/candidates/{id}/	Optimistic stage drag-and-drop Kanban Board updates.
RecruitmentInterviewsPage.tsx	POST /api/recruitment/interviews/	Interview round logs, scores, strengths, and CTC negotiations.
ReferralsPage.tsx	POST /api/recruitment/referrals/	Internal employee referral reward commissions tracking.

Phase 2: Employee Induction & Onboarding

Validates candidate documents on joining, spawns the User credentials, and configures shift and location profiles.

UI Component / Screen	Backend API Endpoint	Operational Description
ChangePassword.tsx	POST /api/auth/change-password/	Forced reset onMustChange password check during login.
EmployeeBulkImport.tsx	POST /api/employees/bulk-import/	Drag-and-drop CSV validation templates and records import.
EmployeeDocumentsPage.tsx	POST /api/employee-documents/upload/	Checklist file verification (PDF/JPG, max 10MB sizes).

Phase 3: Active Operations & Live Management

Tracks daily geofenced attendance logs, leaves ledger balances, and publishes urgent announcement posts.

UI Component / Screen	Backend API Endpoint	Operational Description
AttendanceWorkspace.tsx	POST /api/attendance/check-in/	Geofence radius calculations mapping coordinates on clock-in.
MyWorkspace.tsx	GET /api/leave-balances/my-summary/	Personal leave credits, adjustments ledger, and task lists.
Announcements.tsx	POST /api/announcements/{id}/mark-read/	Pinned posts view logs with target department audience controls.

Phase 4: Compensation, Payroll & Statutory compliance

Handles salary revisions, loan EMIs deductions, monthly batch runs, and statutory compliance data exports.

UI Component / Screen	Backend API Endpoint	Operational Description
MovementWorkspace.tsx	POST /api/salary-revisions/{id}/approve/	Approval logs that auto-updates base salary in profile.
EmployeeLoans.tsx	POST /api/employee-loans/{id}/approve/	Advances tracking with auto-generated repayment cycles.
